

Acceptable Solution

E2 External Moisture

First Edition – effective 28 November 2019

Light steel framing weathertight solution for buildings up to 3 storeys or of 10m.

The National Association of Steel Framed Housing (NASH) Building Envelope Solution is a means of demonstrating compliance with New Zealand Building Code (NZBC) clause E2 External moisture for light steel framed buildings. The NASH (National Association of Steel Framed Housing) Enclosure Standard is available for free from www.nashnz.org.nz/documents-for-purchase. Refer to supporting information for limitations.

Supporting Information

Effective use	<p>The NASH Building Envelope solution provides a compliance pathway for Light steel framed buildings within the scope identified in its paragraphs 1.1 – 1.2.4 for NZBC clause E2 External moisture.</p> <p>Compliance with other NZBC clauses such as E3 Internal moisture and H1 Energy efficiency require their own detailed consideration.</p>
